"I think," she answered, "that we had better go back to the ball room."
He stopped and looked at her and her face flushed. Then he led her on into the conservatory, and they sat down.

The New York Sun is a good judge of iman nature when it says that Hon. Charles James Faulkner can carry more

Charles James Faulkner can carry more states in his mind than any other man in the country. Speaking of our doughty Democratic senator's penchant for gold dollars, the Sun observes:

The sons of silver are said to look coldly upon the Hon. Charles James Faulkner, who as chairman of the Democratic conscress committee last year warged a prophetic tongue so industriously. They accuse the West Virginia statesman of having used the campaign funds contributed by the "folling masses" to disseminate gold bug documents, and they cry for a new and trustmasses" to disseminate gold bur documents, and they cry for a new and trustworthy chairmen, who will think, talk, and breathe nothing but silver. Up starts the Hon, Buck Hinrichsen, a man of weight from Illinois, and begs to be elected chairman. Up start certain friends of the Hon, Slim Jim Richardson, of Tennessee, and cry that he is the man for the hour and job. But Slim Jim is one of the numerous "leaders" of the Democratis in the present house of representatives, and he has made up his mind, without consultation with the flon. Joe Bailey or anybody else, to be speaker of the next house of representatives, for which he has already elected a Democratic majority. Clearly, Slim Jim has trouble enough already, and the majestic Buck should be preferred. Yet gratitude should allow Mr. Faulkner to keep his chairmanship. There may be more acute political managers, but there cannot be a more genial, confident, and rosy maker of figures. Mr. Faulkner can carry more states in his mind than any other man in the country.

FINANCE AND TRADE.

The Features of the Money and Stock Markets. NEW YORK, Jan. 6.—Money on call

firm at 36314 per cent; last loan closed at 3@3% per cent. Prime mercantile paper 31464 per cent. Sterling exchange strong, with actual business in bankers bills at \$4 85@4 85% for demand and at \$4'82%@4'83 for sixty days; posted rates \$4'83% and \$4'86; commercial bills \$4 82. Silver certificates 57%@58c. Bar silver 56%c. Mexican dollars 45%c.

To-day's stock market was broad animated and strong throughout and gains were maintained with only insignificant reactions at intervals. Buying was on a very large scale and was aggressive and confident. A number of prominent operators were in the movement and their combined takings made up a large share of the total transacfest an outside interest in the market which was awakened by yesterday's strength and the commission house business was on a fairly large scale The investment demand for safe dend paying stocks and the heavy buying of bonds were also evidences of ar infusion of new life into the market. It is likely that these dealings were pro-fessional nevertheless and they seemed to have been incited by the very con-fident expressions of one of the largest and most dashing operators in the man ket and who was in large part the leader of last summer's rise.

Some of the most notable gains were achieved early in the and were quite firmly held throughout. even in the face of very large transactions. There was suggestion of realizing in this, but all offerings were well absorbed. The closing was only slightly below the best and showed net gains of between 1 and 2 points for nearly all active stocks. Prices for American securities were good in London and in Europe to-day and gave an impetus to the rise at the opening here, the international stocks being the first to advance. The next to feel the movement were the Vanderblits, New York Central being conspicuous for the large buying and an extreme advance of two points. There was a report circulated that the active managers of these pro perties had been sharply admonished by the controlling interests that they hold on their positions would be made dependent on rates for traffic being maintained on their lines. Reports on the settlement of differences rates from the west also helped on the rise. The coalers all enjoyed marked gains on reports of increased business and better prices. Continued strength Sugar also helped to sustain the market. The prevailing tightness of money showed the first decisive tendency towards easier rates to-day and which most loans were made at 314 per cent, the rate yielded to 3 per cent and closed at that. There was a better demand reported also for commercial paper, though not sufficient to cause a yielding of the rate which continued at 316 to 4 per cent for choice grades. There was some outstanding short interest in the market and the coverings of this helped on the rise.

The bond market was even more tive and stronger than stocks and some notable gains were scored. There were two transactions of \$100,000 par value, one in Brooklyn Transit fives and the other in Wabash firsts, Commercial Cable fours gained 3½ per cent; Susque-hanna & Western general fives 2½ per cent; Missouri Pacific collateral trust company 2 and Mobile & Ohio 4's 1% per cent. Total sales, \$5,000,000.

Government bonds were 14 per cent higher all around. The total sales of stocks to-day were

289,600 shares.

Evening Post's London financial cablegram:

The stock markets here were good today and fairly active, chiefly in the speculative departments where the features were the boom in Grand Trunk and the Canada Pacific's.

Americans were also good and closed at the best. There is more interest here but little business, Berlin, however, is buying Canada Pacific's and America's freely.

feature to-day was the great tightness of money in India.

I am told privately that half a mil llon in gold may go from the Bank of England to Argentina. This will steady money rates here.

To-day's gold exports have caused a firmer tone in local 'money market which has prevented discount house from lowering deposit rates.

Breadstuffe and Provisions.

CHICAGO-Bearlsh statistical news predominated in the wheat market for the first part of to-day's session and the price declined a cent. The improved cash situation started things the other way and at the close May wheat showed 16c advance over yesterday's final price. July, however, closed %c lower. Corn after weakness, became strong and closed 14614c higher. Oats were firm and advanced %@%c. Provisions declined 714@1214c.

News affecting wheat before trading commenced was chiefly bearish and that was clearly the effect it had upon the speculators. May, which closed yesterday at 90%c,opened at from 90c down to 89%c, sold very sparingly at 90@90%c and then slid off quickly to 89%c. For two hours the range of the fluctuations was practically limited between the extremes mentioned. The main points of the early market information were as follows: Liverpool quoted a decline of 116d to start with and the reason for it was in one cablegram ascribed to lib-eral offerings of Argentine wheat and in another to Thoman's reported export surplus of 100,000,000 bushels still available in this country. A private cablegram from Paris said wheat was rapdeclining and the market was very weak and depressed. The price current remarked of the condition of winter wheat that it was generally protected by snow. The northwestern receipts also were still too liberal to create fresh bullish sentiment. Minheapolis and Duluth received 376 carloads, compared with 583 last week, but they looked heavy when put against 209 a year ago. Russia's encouragement to shipment of flour to that country in preference to wheat in the shape of rebates in railroad freights of from 16 to 20 per cent in favor of flour, was also considered a reason for lower prices here.

The only bullish feature of the early news was the small Chicago receipts. The number of carloads inspected here was 41, against 80 expected and only three of the lot inspected were contract. Some features of the local cash wheat market came into play later in the day and was one reason for a change that took place in speculative sentiment and turned despondency at the beginning into buoyancy in the latter half of the session., No. 3 spring was sold in carlots at \$9c, when May was quoted at 89% and generally the off grades in the sample market were bringing more money by from 1c to 3c per bushel than the same quality sold at yester day. The upward turn to the market was helped also by the liberal clear ances from Atlantic ports, which in wheat and flour amounted to 56,000 bushels. Reports from Baltimore were likewise forthcoming to the effect that three steamers had been chartered there for wheat, and New York also reported some fresh business done for export. Closing cables made Liverpool latest prices from 14d to 14d lower than those of the previous day. Perhaps as influential a factor in the afternoon bulge'as any was the fact that several heavy local shorts bought steadily for an hour when the price of Mar was between 89% and 90% and when owing to the late bullish advices from the outside the general crowd who were short tried to buy and found the salable wheat had all been absorbed. The price for May slowly recovered to 9014c and moved up more rapidly afterward to 90%@90%c and closed at 90%c bid r 4e higher than it did yesterday.

Corn was moderately active, follow ing in its course the changes in wheat prices. The market was so weak early with wheat, but when that market reacted corn advanced so easily that it appeared as though it had been pretty thoroughly liquidated. Near the close shorts became alarmed and the best prices of the day were prevailing as the session ended. Commission houses and scalpers were the sellers. May ranged from 294,629%c to 28%c and closed 4,6%c higher at 294,629%c. Oats were firm throughout the session, even with wheat and corn weak. Shorts both large and small were constant buyers and their operations caused a slow but steady advance in prices. The small supply of contracts oats in Chicago tended to create some anxiety among shorts. A good shipping demand existed. May ranged from 22%@23c to 23%c and closed %@14c higher, at 2314@

Provisions were weak from the gtart Hog receipts both here and at western points, were heavy, which was regarded as sufficient cause for lower opening prices. Packers were free sellers and the heaviness was added to as the session progressed. There was a little bet ter demand at bottom figures. At the close May pork was 1214c lower \$9 2234; May lard 714 lower at \$4 8214 and May ribs 10c lower, at \$4 621/4.

Estimated receipts Friday: Wheat, 54 cars; corn, 555 cars; oats, 295 cars; hogs, 35,000 head.

Dry Goods.

NEW YORK—The feature of the dry goods market has been the slump in print cloth prices, the report of sales at 23-16c being verified. This is a new record for low prices in print cloths, and the sales have had a decidely depressing effect on the market. No further sales were reported to-day, but this is accounted for by the statement that bids now being made are on a basis of 2½c for spot extras. This is in consonance with the depressed condition of the cotton goods market. The market for staple cottons has been dull again to-day. In prints the business passing to-day. In prints the business passing is still limited. Agents are actively employed but business does not come up to expectations.
